

QUALITY AND ENVIRONMENTAL POLICY

The Direction of OCSA PROSPECTING AND STUDIES, Ltd. has adopted the criteria of ISO 9001 and ISO 14001, as arguments to build their management systems. These, understood as a coherent group, serve as frame to develop each of the processes of the organization; being, at the same time environmentally friendly.

Since the assumption of these principles, OCSA is committed to provide the means to understand the needs and current and future customer expectations, meet legal and regulatory requirements that apply, as well as other requirements to which the organization subscribes, establish a framework reference to achieve the satisfaction of stakeholders, increase awareness, motivation and active participation of the people in the company, plan ahead and change management and continuously improve the performance of the organization so consistent with preservation of the environment.

The management team commits to direct all their actions towards the reduction and prevention of environmental impacts that may occur in the development of its activity, paying particular attention to the protection of the environment. To do this, OCSA is committed to establish and periodically evaluating compliance targets to ensure the principle of pollution prevention.

This position is to create value for the organization, customers and other stakeholders (employees, suppliers, shareholders and society). And this value must be understood from the competitive advantage and confidence with a commitment to positive references and reputation of the company, customer loyalty, operating results, fast and flexible responses to market opportunities and optimizing processes, costs and cycle times, through the effective and efficient use of resources.

As collateral for this purpose, OCSA has the means and implement actions necessary to achieve and maintain their quality management systems ISO 9001 and environment by 14001.

These systems are range for all company activities, including those unincorporated joint venture, in which systems are adopted, quality and / or environment, of OCSA as a reference to develop themselves targeted by the project or contract.

The Direction of OCSA delegates, explicitly, in the figure of Responsible Management the authority to that with due independence of all parties involved, be responsible for the development, implementation, updating and monitoring compliance with all System Quality management and transmission of the need to take into account the requirements of our customers.
